

## NHS Shadowing Orientation

### How to Interact with Patients

- Be respectful to our patients, their visitors, physicians and staff.
- Conduct yourself in a professional and respectful manner.

### No Smoking Policy

- NHS is a non-smoking organization.
- Smoking is **NOT** permitted on this campus; this is a smoke free facility

### Communication Channels

- You will be shadowing your preceptor and should communicate any questions or concerns you may have with that individual. In the event your preceptor is not available, ask for Director of that particular patient care area.

### Fire Safety: FIRE EMERGENCY PRE-PLAN:

- Know the location of the nearest fire alarm.
- Know the location of fire extinguishers.
- Know the location of all exits.
- Do not use elevators.
- Remain Calm.

### Emergency Codes:

- **Code Red:** Fire
- **Code Pink:** Missing infant, toddler, child
- **Code Grey:** Person threat to self or others
- **Code Black:** Active Shooter

### Infection Prevention

- Nanticoke Health Services' staff will follow the recommendations for practicing hand hygiene from the Center for Disease Control and Prevention. Hand hygiene can be accomplished by using an alcohol-based hand rub or by washing with soap and water. Follow your preceptor's lead on all additional precautions that are needed.

### Telephone/Cell Phone Use:

- Do not use your personal cell phone once you are in a patient care area.

I have received training on the topics listed above from a qualified representative of Nanticoke Health Services, Inc. I have also completed and returned all required forms to the NHS representative.
